Ritedev Technologies

Engineering for the Future.

Built for Reality.

✔ We build things that work.

Building software that **actually** works for Nigeria.

Most tech companies tell you what they can do. We show you what we **won't** do: we won't disappear, we won't give you spaghetti code, and we won't "wash" you.

Ritedev exists for one reason: to be the tech partner that delivers without the premium tears. We build for the Nigerian reality—slow networks, high expectations, and the need for absolute reliability.

“

No Wash.
No Ghost Mode.
Just Engineering.

The Ritedev Mantra

Your In-House Tech Team, Outside Your Office.

Ritedev is a high-performance software engineering firm. We are developers, security auditors, and product thinkers who believe "good enough" is never actually enough. We build from scratch. We optimize for local internet speeds. We design for real users.

99%

Uptime Focus

5x

Speed Optimized

100%

Custom Built

24/7

Local Support

What Drives Us Every Day.

No Wash

Integrity. We are honest about what works and what doesn't. We won't sell you a solution you don't need.

Sharp Sharp Delivery

We move fast, but we don't cut corners. We value your time as much as we value our craft.

Customer First

Everything we build is designed for the person who will actually use it, not just the person who pays for it.

Building Assets, Not Just Code.

Comprehensive engineering solutions tailored to your business needs.

Web Applications

Portals · Dashboards · Marketplaces

We build secure, browser-based tools that handle complex business logic—from school portals to global marketplaces.

✓ High-Fidelity Wireframes

Visual prototypes before a single line of code

✓ API-First Architecture

Modular backend built for scale and integration

✓ Responsive Frontend

Works on everything from \$40k Android to MacBook Pro

</> Laravel · Node.js · Django · Next.js · React.js · Vue.js

Custom Software

Internal Automation · Bespoke Systems

Bespoke systems built to handle your unique business workflow. We digitize manual processes and eliminate bottlenecks.

✓ Process Shadowing

We shadow your team to understand manual bottlenecks

✓ Microservices Architecture

Lightweight systems that grow as your business scales

✓ Zero Disruption

Seamless transition from manual to digital workflows

Scalable · Modular · Future-Proof

Mobile & Intelligence.

High-performance mobile apps and AI-powered automation for modern businesses.

Mobile Applications

iOS · Android · Cross-Platform

High-performance apps that stay fast even on patchy Nigerian mobile networks. Built for the real world.

✓ Cross-Platform Speed

Flutter/React Native for rapid market deployment

✓ Native Performance

Swift/Kotlin for heavy processing and gaming

✓ Offline-First Design

Users keep working even when data is low

Flutter · React Native · Swift · Kotlin

AI Integration

Automation · Intelligence · LLMs

Adding the power of LLMs and Machine Learning to your existing business tools for next-level automation.

✓ Task Identification

We identify repetitive data and chat tasks

✓ Private AI Models

API or Local LLMs that learn from your data

✓ Business Automation

Customer service, content generation, predictive analytics

LLMs · Machine Learning · Predictive Analytics

Cybersecurity & Trust.

Professional-grade security auditing and blockchain engineering for mission-critical systems.

Security Audit & QA

Vulnerability Assessment · Penetration Testing

Professional-grade auditing to identify vulnerabilities, performance gaps, and logic flaws in your software before attackers do.

- ✓ **Black Box Testing**
Attacking as an outsider to find exposed weaknesses
- ✓ **White Box Testing**
Source code review for logic flaws and security gaps
- ✓ **Remediation Roadmap**
Comprehensive report with actionable fixes

🔗 Burp Suite · Metasploit · Wireshark · Nmap · Kali Linux

Blockchain & Crypto

Smart Contracts · DApps · DeFi

Secure smart contracts and decentralized applications (DApps) for modern finance and digital asset management.

- ✓ **High-Security Solidity**
Rigorous coding standards for immutable contracts
- ✓ **Fuzzing & Formal Verification**
Mathematical proof of contract correctness
- ✓ **Gas Optimization**
Lowest transaction costs with maximum security

🔗 Solidity · Rust · Hardhat · Foundry · OpenZeppelin

The Tech Stack.

We use the tools of the masters. Battle-tested technologies for enterprise-grade solutions.

Programming & Frameworks

Backend

Laravel (PHP)
Node.js (TypeScript)
Django (Python)

Frontend

Next.js
React.js
Vue.js

Mobile

Flutter
React Native
Swift · Kotlin

AI/ML

OpenAI API
Local LLMs
TensorFlow

Cybersecurity & Hacking

 Burp Suite Pro

 Metasploit

 Wireshark

 Kali Linux

 Parrot Security

Blockchain & Crypto

 Hardhat

 Foundry

 Solidity

 Rust

 Ethers.js

 OpenZeppelin

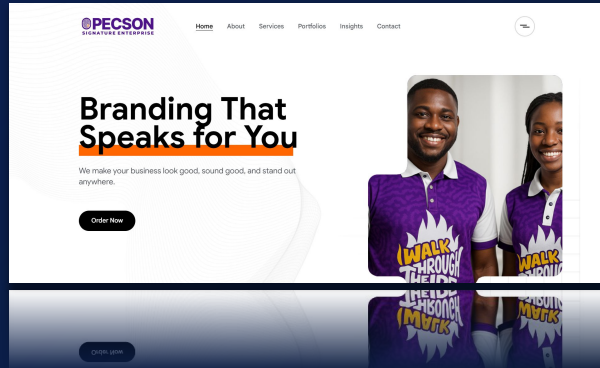

Infrastructure

AWS · DigitalOcean · Docker · Kubernetes

 Cloud-Native · Scalable · Resilient

Case Studies: Enterprise & Agriculture.

Real projects. Real results. Built for Nigerian businesses.

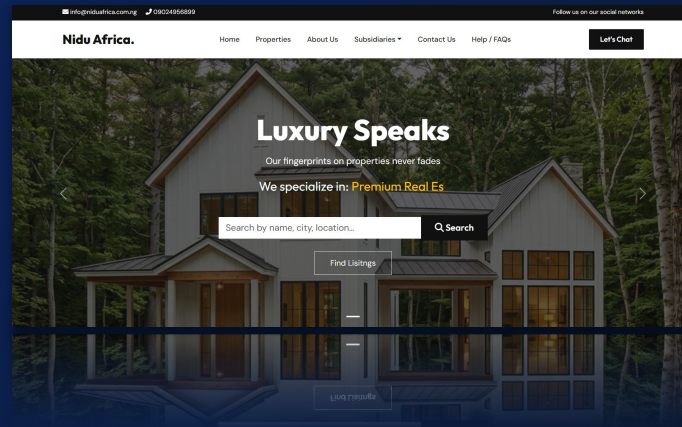

Enterprise

Opecson Signature

Business Management Portal with HR, payroll, attendance, and order tracking.

80% reduction in manual processing

opeconsignature.com

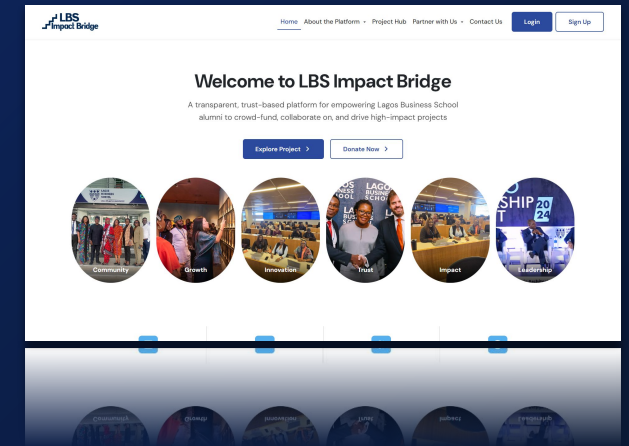

Agriculture

Nidu Africa

Multi-subsidiary management portal with role-based access for farms and palm oil units.

Centralized monitoring, zero data leaks

niduafrica.com.ng

Non-Profit

LBS Impact Bridge

Crowdfunding platform with real-time milestone tracking for community projects.

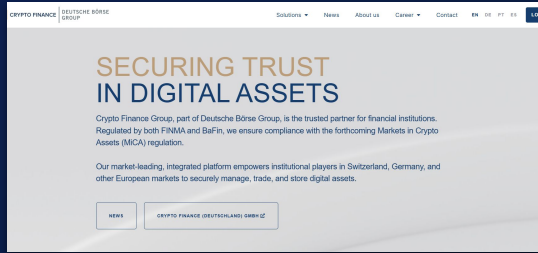

100% reporting accuracy

lbsibridge.org

Case Studies: Security, Hospitality & Education.

Diverse industries. One standard of excellence.

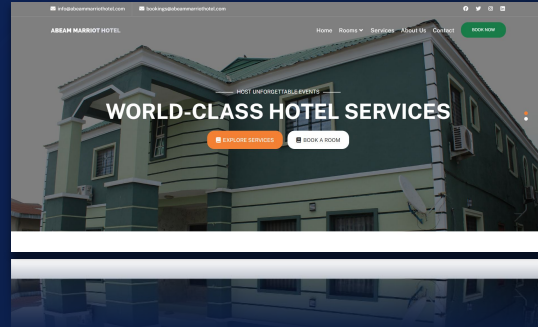

Security Audit

Crypto Finance Audit

End-to-end cybersecurity audit and QA process.

 **12 critical vulnerabilities patched**

Certified Secure

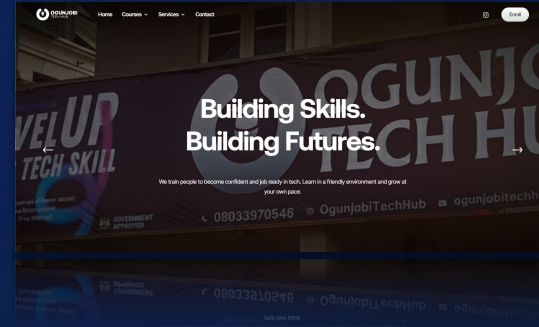

Hospitality

Abeam Marriott Hotel

Hotel Management System with automated room allocation.

 **Zero booking conflicts**

abeammariiothotel.com

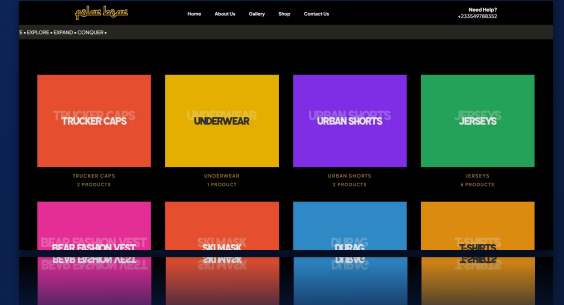

Education

Ogunjobi Tech Hub

Dual-portal system for enrollment and staff management.

 **Hundreds of students enrolled**

ogunjobitechhub.com

eCommerce

Polar Bear Brand SZN

High-speed fashion eCommerce optimized for mobile.

 **Significant sales increase**

polarbearbrandszn.com

Our Audit Methodology.

How we ensure you are ready for launch. A battle-tested 5-step process.

01

Reconnaissance

We map your entire application surface to understand the attack landscape.

02

Auto Scanning

Professional tools find "low-hanging" bugs and common vulnerabilities.

03

Manual Exploitation

Our engineers attempt to hack your system as malicious users would.

04

Remediation

We don't just find bugs; we show your devs how to fix them permanently.

05

Certification

Once patched, we issue a "Ready-for-Launch" audit report.

Ready for Launch Certification

Every audited project receives a comprehensive security report and certification.

100%

Audit Success Rate

RiteLearn & The Resource Library.

Engineering-led training and open-source contributions for the Nigerian tech ecosystem.

RiteLearn

The Knowledge Hub

Professional training in modern software engineering, design, and product management. Not your average tutorial site.

- ✓ **Build-Along Methodology**

Students don't just watch; they participate in real-world sprints

- ✓ **Industry-Ready Skills**

Using the same tools we use for enterprise clients

- ✓ **Beyond Tutorials**

Focus on practical, job-ready capabilities

 [Software Engineering](#) • [Design](#) • [Product Management](#)

Resource Library

Sharing the Blueprint

A curated collection of technical assets, frameworks, and strategy documents for the Nigerian tech ecosystem.

- ✓ **Open-Source Workflows**

Internal design systems and processes made public

- ✓ **Startup Acceleration**

Resources to help startups move faster and smarter

- ✓ **Weekly Updates**

Updated based on new industry trends and security findings

Don't just build. Engineer for success.

Ritedev Technologies. We build things that work.

Frequently Asked Questions

? Can you take over a project started by another team?

Yes. We conduct a full Audit first to ensure the foundation is solid, then seamlessly take over development.

? How do we start?

Simple. Send us a brief. We'll send you a Concept Note and Timeline within 48 hours.

? What industries do you serve?

From agriculture and hospitality to education, finance, and eCommerce — if it needs code, we build it.
